

Boiler safety group assembly KSG

Benefits

- Compact version in form-fit insulation
- Time-saving installation with pre-assembled, tightness-tested assembly
- Vent chamber for collecting and separating the air and the water in the heating system
- Quick air vent PrimoVent with two-way venting principle for automatic venting
- Pressure gauge for heating installations for direct indication of the system pressure
- Safety valve for protection against overpressure
- Service-friendly: Quick air vent can be replaced without draining
- For heating systems with a capacity of up to 50 kW

Application

For sealed heating systems as per EN 12828 with a capacity of up to 50 kW.

Description

Complete, pre-assembled, tightness-tested boiler safety group assembly. Consisting of carrier, pressure gauge for indicating the system pressure, quick air vent with aqua stop and diaphragm safety valve MS, including form-fit insulation. With self-sealing mounting valve for easy replacement of the quick air vent.

Technical specifications

Connection boiler G1 female

Operating temperature range Max. 120 °C

 Dimensions
