- Olovka
- Križni odvijač
- Imbus ključ 4 mm, 2.5 mm
- Libela
- Škare

Fly-In kvadratna kabina upute za montažu

HR

Prije ugradnje provjerite ugradne mjere budući da se one uvijek razlikuju od nazivnih. Apsolutno brtvljenje tuš kabina i/ili vrata/stranica nije moguće. Srednja vodonepropusnost.

Molimo Vas da se upoznate sa uputama prije početka montaže:

1. Provjerite da li imate potreban alat
2. Provjerite da je mjesto za montažu kompatibilno sa veličinom kupljenih vrata
3. Provjerite sve priložene komponente
4. Provjerite da je oprema za montažu kompletna. **NE POČINJITE** montažu ako niste provjerili sve 4 točke iznad.

Osigurajte da stavke navedene ispod nisu problem prije bušenja rupa na zidu.

1. Zidne uloške dobivene od proizvođača unutar opreme za montažu namijenjene su za upotrebu na čvrstim zidovima. Šuplji ili montažni zidovi zahtijevati će alternativne uloške.
2. Osigurajte da nema vodiča, cijevi ili drugih stvari skrivenih unutar zida.
3. Možda će biti potrebno kontaktirati dobavljača pločica vezano uz pravilnu metodu bušenja pločica.

Staklo je lomljivo, molimo obratiti posebnu pozornost pri pomicanju ili montaži i izbjegavajte udarce u tvrde površine. Stavite ih u pravilan položaj, malo ukoso na zid na meku podlogu nakon raspakiranja.

1. korak

Postavite zidni profil na ispravnu lokaciju, provjerite libelom, te olovkom označite poziciju za bušenje rupa. Električnom bušilicom i odgovarajućim svrdlom izbušite rupe na označenim pozicijama te u njih umetnite zidni uložak i učvrstite zidni profil.

2. korak

Postavite obje bočne stranice kako je prikazano na slici niže.

Fly-In kvadratna kabina upute za montažu

HR

3. korak

Postavite okvir vrata.

4. korak

Učvrstite 180° nosač kako je prikazano na slici 10 te postavite poklopce profila (slika 11 i 12).

Fly-In kvadratna kabina upute za montažu

HR

5. korak

Postavite vrata kabine, rukohvate, donju brtvu vrata te pomoću vijaka na kotačićima (slika 17) podesite vrata da budu u "nulu".

6. korak

Silikonizirajte Vašu kabinu samo s vanjske strane. Na spojevima profila silikonirajte 4cm, kako je niže naznačeno na slici.

Oprez:

Udaljenost kišnog tuša od vratiju mora biti minimalno 250mm sa svake strane.

Fly-In kvadratna kabina upute za montažu

HR

- 1 Udaljenost kišnog tuša od vratiju mora biti minimalno 250 mm.
- 2 Mlaz vode iz tuš slušalice NE direktno usmjeravati po vertikalnim brtvama, zidnim profilima i donjim brtvama na vratima.

Čišćenje i održavanje

Održavajte i čistite svoju kabinu redovito kako bi spriječili nastanak kamenca i problema prilikom zatvaranja. Čišćenje tuš kabine vršite s mekom krpom i blagim deterdžentom. Kabinu ne čistite s agresivnim sredstvima kao što su alkohol, benzin ili ostala kemijska sredstva. Nakon što je kabina postavljena ukoliko prilikom otvaranja/zatvaranja vrata škripe možete sredstvo za podmazivanje staviti na valjak kotača i profil.

Fly-In kvadratna kabina

navodila za montažo

SI

POMEMBNO

Pred montažo preverite vgradne mere, saj se vedno razlikujejo od nazivnih. Absolutno tesnjenje tuš kabin in/ali vrat/stranic ni možno. Srednje vodotesen.

Prosimo, da se pred začetkom namestitve seznanite z navodili:

1. Prepričajte se, da imate potrebna orodja
2. Preverite, ali je mesto namestitve združljivo z velikostjo kupljenih vrat
3. Preverite vse priložene komponente
4. Preverite, ali je oprema za montažo popolna. **NE ZAČNITE** z montažo, če niste označili vseh 4 zgornjih točk.

Pred vrtanjem lukenj v steno se prepričajte, da spodaj navedeni elementi ne predstavljajo težav.

1. Stenski vložki, ki jih proizvajalec zagotovi v montažnem kompletu, so namenjeni uporabi na trdnih stenah. Votle ali montažne stene bodo zahtevale alternativne obloge.
2. Prepričajte se, da v steni ni nobenih vodnikov, cevi ali drugih predmetov.
3. Morda se bo treba obrniti na dobavitelja ploščic glede ustrezne metode vrtanja ploščic.

Steklo je krhko, zato bodite posebej pozorni pri premikanju ali nameščanju in se izogibajte udarcem ob trde površine. Po razpakiranju jih postavite v pravi položaj, rahlo diagonalno na steno na mehko površino.

1. korak

Stenski profil postavite na pravilno mesto, preverite z vodno tehtnico in s svinčnikom označite mesto za vrtanje lukenj. Z električnim vrtnikom in ustreznim svedom na označenih mestih izvrtajte luknje in vanje vstavite stenski vložek ter pritrdite stenski profil.

2. korak

Postavite obe strani, kot je prikazano na spodnji sliki.

Fly-In kvadratna kabina

navodila za montažo

SI

3. korak

Namestite okvir vrat.

4. korak

Pritrdite 180° nosilec, kot je prikazano na sliki 10, in namestite pokrove profila (sliki 11 in 12).

SI

Namestite vrata kabine, kljuko, spodnje tesnilo vrat in nastavite vrata na "nulo" z vijaki na kolesih (slika 17).

6. korak

Silikonirajte vašo kabino samo od zunaj. Silikon 4cm na spojih profilov, kot je prikazano spodaj na sliki.

Pozor:

Razdalja dežne prhe od vrat mora biti najmanj 250 mm na vsako stran.

Fly-In kvadratna kabina

navodila za montažo

SI

- 1 Razdalja dežne prhe od vrat mora biti najmanj 250 mm.
- 2 NE usmerjajte vodnega curka iz glave prhe neposredno na navpična tesnila, stenske profile in spodnja tesnila na vratih.

Čiščenje in vzdrževanje

Redno vzdržujte in čistite svojo kabino, da preprečite vodni kamen in težave z zapiranjem. Očistite tuš kabino z mehko krpo in blagim detergentom. Ne čistite kabine z agresivnimi sredstvi, kot so alkohol, bencin ali druge kemikalije. Ko je kabina nastavljena, lahko škripa mazivo na kolesnem valju in profilu pri odpiranju/zapiranju vrat.

IMPORTANT

Before final montage please note and check that final Installation measure don't suit measure in name. Absolute sealing for all doors, side panels and shower enclosure is not possible. Medium water resistance.

Please familiarise yourself with the fitting instructions before commencing fitting.

1. Check that you have the tools required.
2. Check that the installation site is compatible with size of door supplied.
3. Check all the enclosure components.
4. Check that the installation kit is complete. **DO NOT** attempt to install the product unless you can tick all 4 boxes as satisfactory.

Ensure the below 3 items are no problem before drilling holes on wall.

1. The wall plugs supplied with the installation kit are for use in solid walls. Hollow or 'stud-partition' walls will require alternative fixings.
2. Please consult a hard ware supplier for the correct type.
3. Ensure there is no wire, pipe and any other things hidden in wall.

It may also be necessary to consult your tiling supplier about the correct method for drilling your ties.

Glass is fragile, please pay great care when you move or install it and avoid bumping it into hard things. Place them upright but slightly aslant against the wall on the soft cushion after unpack it.

Step 1

Place wall profile into correct location, level them, mark the hole position, drill holes, insert wall plugs and install the wall profile.

Step 2

Install side panel, fixed panel.

Fly-In Shower Enclosure

Installation manual

EN

Step 3

Install moving door frame.

Step 4

Install bracket, adjusting profile cover cap, corner post cover cap.

Fly-In Shower Enclosure Installation manual

EN

Step 5

Install moving door, handle, bottom seal, adjust levelness.

Step 6

Silicone. Bottom aluminum connection/joint place upward Silicone 40mm.

Attention:

Distance between rain shower and shower door, rain shower and side panel have to be minimum $>250\text{mm}$.

Fly-In Shower Enclosure

Installation manual

EN

1 Distance between rain shower and shower door have to minimum 250 mm.

2 Do not direct the jet of water from the shower head on the vertical seals, wall profiles and bottom seals on the door.

Cleaning and Maintenance

Clean the sundries regularly to prevent the drain from being jammed. Usually, clean the shower enclosure by mop with mild detergent. Don't clean the shower enclosure with irritant detergent, such as alcohol, gasoline or other chemical cleaner. Should there be any dirty stains on the shower enclosure, you may clean it by calico with toothpaste, but you need to clean it with water afterwards. After the installation is completed, if you find there is much noise when the glass door moves, you may add small quantity of lubricant onto the roller wheel, slipping hook and the track.
